About Taiwan Excellence

Taiwan Excellence is a prestigious award from Taiwan, bestowed only upon a select handful of brands that represent the best made in Taiwan, recognized for their innovation and achievements. Organized by the Taiwan Administration of Trade (TITA), this award underscores the government's commitment to promoting outstanding Taiwanese industries on the global stage.

Each year, a cross-disciplinary team of jurors embarks on a mission to identify and select Taiwanese brands that are setting new standards in sustainability, design, R&D, quality, and marketing.

Over the years, Taiwan Excellence has evolved into one of the most sought-after and recognizable symbols worldwide, further solidifying Taiwan's reputation as a trusted global partner.

Acer Incorporated

Acer is evolving with the industry and changing lifestyles by continuing to push for innovation in existing businesses, while expanding to new territories. In the PC and displays business, Acer is committed to strengthening the foundations with technological innovations, and designing unique product lines for the specific needs of gamers, creators, education, usage in harsh environments, and more. In the gaming market, Acer has expanded the ecosystem it built to include 5G connectivity, social media platform, accessories, and beverages. For creators, Acer has launched a new stereoscopic 3D experience empowered by cutting-edge optical, display and sensory technologies that bring the virtual world to a more physical dimension.

At the same time, Acer's strategy is to explore new opportunities, expand into adjacent territories, and cultivate multiple business engines. These include smart solutions for medical, public health systems, air monitoring, cities, water quality/conservation, and many more being developed by Acer.

BREATHE & GROW

Macrohi Co., Ltd.

Founded in 2003, MacroHI has more than 80 employees and its founder- Mr. Eric Chen is the 3rd generation of professional hair products manufacturer.

Based on more 60+ years experience in hair product research and development, MacroHI determined to focus on "brand" and "R&D" when it was founded. In 2004, MacroHI invested in scalp research, creating scalp hair products, patented scalp examination software apps, publish scalp education textbooks, and establishing scalp care academ, dedicating to the scalp ecosystem.

Corporate social responsibility is an important part of MacroHi. Since 2016, the company starts working on the 3 major actions.

1. Care for group in need & its caregivers
2. Care for the earth
3. Care for the employees

we have strong faith that people can deliver positive power once they are well taken care of.

Uni-Paragon Enterprise Co., Ltd

Uni-Paragon Enterprise was established in 1993, initially focusing on OEM bag manufacturing for international brands. With years of experience and craftsmanship, we transitioned in 2011 to launch our own brand, deya, with the vision of creating the finest bags in Taiwan – not just to carry belongings, but to carry dreams and responsibility.

In 2017, deya received the Taiwan Excellence Gold Award and a Gold Medal at the Concours Lépine in Paris, highlighting our strength in innovation and design. In 2024, we introduced Taiwan's first carbon-neutral backpack, the "Zero Carbon Backpack," made with 90% mono-material. Each bag reduces carbon emissions by 0.8 kg, amounting to a total reduction of 4 metric tons across 5,000 units.

We believe that sustainability is the goal, circularity is the path; a brand represents responsibility – and is the starting point of real impact. This belief continues to drive our innovation as we grow from Taiwan to the world.

Freerider Corp

FreeRider was built from the ground up by our founders Arthur Wang, and that hardworking, down-to-earth spirit still guides us today. From the very beginning, our goal has been simple. That is, to help people with mobility challenges more freely, especially when things get bumpy. That has been our mission since day one in 1995.

With that mindset, we started designing and building our own precision products from the start. We have always believed that great quality and fast, reliable service, no matter where you are in the world, can make all the difference.
