TIGRA 200

The Ultimate Machine - A Superior Product. PGO's brand new DOHC water-cooling engine with perfect burning efficiency to bring high power and performance.

With new generation BOSCH ABS 10, all LED light and multi-link rear suspension, the TIGRA 200 is a scooter which is designed to offer the best solutions for riders' requirements.

MOTIVE POWER

Patented Two Piece Forged wheel

- 3D designed.
- Light weight.
- Cool Designs.
- Fresh Colors.

Each wheel set is tailored to be the most optimal combination of lightweight forging profiles and surface milling features. The wheels consist of a patented two-piece assembly rim and star hub, securely connected with titanium bolts, all designed to improve the handling and performance, increasing dynamic cornering response, acceleration, and decreasing overall stopping distances.

Patented Light Weight Sprocket

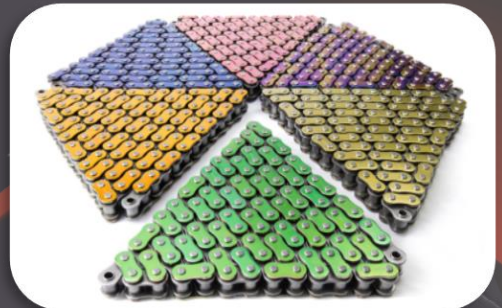

- Exclusive self-cleaning groove pattern.
- Silent.
- Faster.
- Longer life span.

Made of Swiss aluminum 7075-T6, our sprockets are designed to run smoother not only because of its ultra-lightweight construction, but also due to the patented self-cleaning groove pattern, featuring an exclusive coating that reduces the friction with the chain, easily removing the excess of dust and debris collected on the road, making very silent even at high revolutions, and improving drastically the life spam.

High-Density Plasma Ceramic Coating Technology (HDPCCT)

On the basis of keeping balance between environmental protection and product quality, HDPCCT effectively avoids hydrogen embrittlement and traditional electroplating pollution. HDPCCT has excellent characteristics on anti-scratch, abrasion resistance and corrosion protection. Additionally, it can adjust color to fulfill customer's demands and various applications.

Environmentally-friendly Sealed Chain

AM environmentally-friendly sealed chain has an innovative concave flange design and masterly utilize the outer plate and bush as extra protections to contain the lubrication within the bearing. The comprehensive design has tested to effectively prevent dust from going in as well as reduce the wear of the bearing, successfully increasing its life of use.
